

PROJECT Frick Hospital

BUILDING OWNER Frick Hospital.
508 South Church St.
Mt. Pleasant, PA

AREA Four Thousand Four Hundred Thirty Five Square Feet

DESCRIPTION The 18 year old shipping and receiving building had been leaking bad enough to cause damage to the components of the building. Due to the leakage problems, the building owner was convinced that a **\$10.00** per square foot total roof replacement was in the near future.

After a close examination by *Tuscano – Maher Roofing*, many of the neoprene washers on the exposed fasteners had deteriorated. This in combination with failed pipe flashing details had been causing years of roofing aggravation. The Truco manufactured coating system was then installed at a cost of **\$1.25** per square foot to restore the waterproofing integrity for at least another 10 years.

ARCHITECT/SPECIFIER Tuscano-Maher Roofing, Inc.
