

TMR ROOFING

TUSCANO-MAHER ROOFING, INC.

2005

PROJECT Gymnasium/Pool

BUILDING OWNER Valley School
Rector, PA

AREA Eighteen Thousand Three Hundred Square Feet

DESCRIPTION The existing roof was beginning to look pretty bad. The original paint finish was peeling in numerous places. The underlying steel roof panels were being exposed to a potential rusting situation. After performing necessary prep work, including power washing the entire roof system, a new coating system was applied. Two treatments of an owner selected custom color elastomeric roof coating were applied with an airless sprayer. The roof now looks as good as when it was installed and the roof has been restored to a waterproof state!

ARCHITECT/SPECIFIER Tuscano-Maher Roofing Inc.
