

PROJECT Middle Presbyterian Mausoleum

BUILDING OWNER Middle Presbyterian Cemetery
Route 981
Mt. Pleasant, PA. 15666

AREA Thirteen Hundred Square Feet

DESCRIPTION The General Contractor constructed a gable roof enclosure to join twin marble and granite mausoleums. Tuscano-Maher Roofing was contracted to fabricate and install copper fascia covers, gutters and roof panels. The gutters, fascia covers, drip edge and ridge caps were custom fabricated in our shop using a Schechtl Spectrafold computerized folding brake. Standing seam roof panels were fabricated to length, using our Roll Former Corporation SS15 portable pan forming machine. Panels were attached to the substrate using stainless steel cleats with annular shank copper roofing nails.

ARCHITECT/SPECIFIER Astorino Pellis Associates
