

PROJECT Vine Street Towers

BUILDING OWNER Johnstown Housing Authority
Johnstown PA 15907

AREA Twelve Thousand Hundred Square Feet

DESCRIPTION What does it take to successfully reroof the tallest building in Johnstown? Patience, planning and an uncompromising commitment to safety. That's why the Johnstown Housing Authority chose Tuscano-Maher Roofing Inc.. Not only did we have to install a new roof in place of the failed rubber roof, Tuscano-Maher Roofing Inc. had to remove 2 old roofs plus the accompanying insulation and then lower it to the ground over 150 below. A new tapered isocyanurate insulation was designed and installed before a new adhered EPDM roof system was installed. Shop fabricated metal was fabricated on our own computerized brake to add the finishing touches.

ARCHITECT/SPECIFIER E. Palowski & Associates
Johnstown, PA 15907
